TRC2016: Research Models and Methods for Transpersonal Research
Classifying methods: Agency and transformation

- Researcher as integral agent
- Research as journey
- Research as encountering the Sacred
- Research as engaging the ‘unconscious’

<table>

secular  hermeneutical approach  sacred
Midrash as a model for transpersonal methodology

• There is more in the text than is apparent on the surface; all meaning is in the text but we have to engage in the Work in order to find it.
• The method is the Work, the means for encounter.
• Levels in the text – surface (‘literal’ / manifest) and deep (‘secret’ / latent).
• ‘Intertextuality’ – meaning is neither time-bound nor location-bound in the text.
• Driven by questioning the text – how to fill the gaps / resolve inconsistencies etc.
• Associative logic (especially re vowel-less Hebrew text) opens possibilities.
• Guided by experience and/or other systems for knowing (cf amplification).

“Freud displaced Rabbinic hermeneutics from the text of the Holy Writ to the text of the dream, that is—the speaking psyche of the person.”

My beloved is white and ruddy, distinguished among ten thousand. His head is like the finest gold, his locks are wavy, and black like a raven. His eyes are like doves by the water courses, washed with milk, and fitly set.

Song of Songs 5: 10-12

It is taught: The Book of Concealment is the book describing that which is weighed in the balance; for before there was a balance face did not gaze upon face.

Zohar 2:176b

The Ancient of Ancients is called the Elongated Face, and the exterior aspect is called the Small Face—small in comparison to the Ancient One, the Elder, Holy of Holy of Holies. When the Small Face gazes upon the Ancient One all below is restored and His face expands and lengthens at that time—but not permanently like the Ancient One.

Zohar 3:128b
Original Scriptural text

Rabbinical midrash as imaginal method

Detail of ‘divine faces’

Hermeneutic neurophenomenology

Model of ‘deep’ psyche

Extra-biblical knowledge (eg kabbalah / gnosis)

Relate to their knowledge systems
• kabbalistic imagery
• gnostic systems
• etc

Experience of mystics authoring the Zohar

Relate to their experience
• engage with their practices
• understand their context
• etc

Extra-kabbalistic knowledge (eg Jungian / neuroscience)

Experience of the ‘wounded’ researcher

Relate to their experience
• engage with their practices
• understand their context
• etc
